Selected clauses relevant to claim CLM-2026-10001

About this excerpt

This mock Product Disclosure Statement excerpt is written solely for retrieval and coverage-reasoning tests. It is not insurance advice and is not a real financial product disclosure statement.

1. Insured events

Storm. We cover loss or damage caused by violent wind, rain, hail or snow occurring during a storm, including rainwater entering the building as a direct result of storm-created damage to the roof, walls, windows or doors.

Rainwater and run-off. We cover sudden and unexpected rainwater or surface run-off that enters the home, except where an exclusion applies. We do not cover flood unless shown as selected on the schedule.

2. What we pay

For an accepted building claim, we may repair, rebuild, replace, or pay the reasonable cost of restoring the damaged portion to substantially the same condition as immediately before the insured event. We will not pay to improve undamaged property or correct a pre-existing defect.

The standard excess shown on the schedule is deducted once for claims arising from one event. Contents are settled at replacement value when replacement cover applies, limited to the reasonable cost of an equivalent item and subject to evidence of ownership and value.

3. General exclusions

Exclusion	Meaning and application
Wear and tear	Loss caused by ordinary use, ageing, weathering or the expected decline of materials.
Gradual deterioration	Damage developing over time, including long-term water penetration, failed sealant, rot or corrosion.
Maintenance	The cost of maintaining the home or rectifying a condition that a reasonable owner should have addressed.
Faulty workmanship/design	The cost to correct faulty design, materials or workmanship; separately identifiable resulting damage may be considered if caused by an insured event.
Pre-existing damage	Damage that existed before the period of insurance or before the claimed event.

4. Storm claim assessment

We consider weather evidence, the timing and pathway of water entry, physical impact indicators, age and condition of materials, prior incidents, photographs, repair opinions and whether the claimed work restores event damage or upgrades an existing condition.

Where storm damage and excluded deterioration contribute to the same claimed work, we pay only the reasonable amount attributable to the insured event. We may use scopes, apportionment or separate line items to distinguish covered from excluded work.

5. Duties after loss

You must take reasonable steps to prevent further damage, notify us promptly, retain damaged items where practicable, provide truthful information and cooperate with inspection. Emergency work to make the property safe may be undertaken, but permanent repairs should not start until authorised unless delay would worsen damage.

6. Claims evidence

We may request photographs, invoices, receipts, bank records, warranties, statements, maintenance records, prior claim documents and expert reports. A receipt is evidence of historical purchase price, not automatically the current replacement cost.

7. Definitions

Storm	A violent atmospheric disturbance including strong winds, rain or hail; ordinary weathering is not a storm.
Flood	Covering of normally dry land by water escaping or released from a natural watercourse, lake, reservoir, canal or dam.
Home	The residential building at the risk address, including domestic fixtures and permanently attached improvements.
Contents	Household goods owned by the insured and kept at the risk address, subject to listed limits and exclusions.
