Extract date	30 July 2026

Prior claims

Claim / date	Loss description	Outcome	Relevance
CLM-2024-04117 3 June 2024	Minor roof leak after prolonged rain; staining to family-room cornice near rear valley. Contractor resealed valley flashing and replaced a small cornice section.	Accepted; paid AUD 1,180; closed 18 June 2024. Excess waived under minor repair benefit.	Same room/roof zone. May indicate prior water pathway or maintenance history.
CLM-2023-00802 11 January 2023	Laundry flexible hose escaped water; damage to vinyl flooring.	Accepted; paid AUD 3,420; closed 2 February 2023.	Separate cause and area. This may be the "escaped-water claim" remembered on current form.

2024 file note extract

The 2024 contractor noted “aged sealant at rear valley apron; local reseal completed as temporary remedial work; owner advised to monitor and obtain roof maintenance review.” No full valley replacement invoice is held. The claim was coded as weather-related rainwater entry, not storm impact.

Current-claim comparison

The current claim form answers “No” to previous roof leaks and mentions only a 2024 laundry hose claim. The register shows both the January 2023 laundry event and the June 2024 roof leak. Further clarification is appropriate before relying on the declaration.

Underwriting notes

Renewal 2025	Automated renewal; no special terms
Renewal 2026	One prior water claim declared; standard excess retained
Risk controls	No formal roof condition report on file
Fraud indicator	None recorded. A factual discrepancy is not itself evidence of fraud.

Data quality statement

This history is an internal synthetic extract. Claim coding may simplify causation and should be checked against underlying reports before coverage decisions. Dates and amounts are stated in Australian dollars and include GST where the original claim payment did.
